Subj: NOTICE OF IMPENDING WATER DISCHARGE AT ALAMEDA POINT, ALAMEDA,
CALIFORNIA

Dear Ms. Cassa:

As part of the Radiological Removal Action described in the Action Memorandum of August 28, 1998, the Navy intends, within the next few weeks, to initiate discharge of water generated during construction activities. The water will initially be discharged to the Seaplane Lagoon in accordance with the criteria outlined in the June 9, 1998 letter from the San Francisco Bay Regional Water Quality Control Board. All batches will be sampled and analyzed prior to discharge, and results will be presented in the on-site coordinator (OSC) report at the conclusion of the project and be available to you upon request.

The East Bay Municipal Utilities District is in possession of the Navy's application to discharge these waters, but no permit has yet been granted. If a permit is received the Navy will consider discharging future flows to the sanitary sewer based upon technical implementability of meeting the permit limits and relative cost.

Reuse of the water is not currently being implemented due to its high salinity.

If you have any questions, please contact Edward Ho at (415) 222-8228.

Sincerely,

ORIGINAL SIGNED BY

PATRICIA MCFADDEN
Senior Remedial Project Manager
